1.	Most codes are typically updated every decade.	1/1 point
	O True	
	False	
	<ul> <li>Correct</li> <li>Correct! Codes are updated more frequently than every decade. For example, the U.S. National Electric</li> <li>Code is updated every three years.</li> </ul>	
2.	Rules and regulations that apply to ground mounts are always the same, no matter the size of the array.	1/1 point
	True      False	
	<ul> <li>Correct</li> <li>Correct! There are different rules and regulations for small residential systems, as opposed to large solar farms.</li> </ul>	
3.	Loosening codes and regulations is an ideal way to speed up deployment of solar energy.	1/1 point
	O True	
	False	
	<ul> <li>Correct</li> <li>Correct! Easing regulations is not an ideal option for improving the permitting process.</li> </ul>	
4.	The Unified Solar permit offered in the U.S. New York State can be used for what size system?	1/1 point
	25 kW or less	
	O 25 kW or more	
	O 35 kW or more	
	○ 35 kW or less	
5.	What is one reason that permitting offices might consider eliminating the requirement for stamps and engineering letters when standard ground mounts are being installed?	1/1 point
	O Because ground mount systems are being installed more and more often.	
	O Because the engineer will have a hard time determining if the system will be adequate.	
	Because the manufacturer's engineers have designed the systems to meet code requirements.
